New Product Information

## **IN THIS CASE, PUTTING A ‘LABEL’ ON SOMETHING IS A GOOD THING**

*Creform<sup>®</sup> cart provides just the right amount of support for labels and tape handling in a production environment*

Labels and rolls are used in manufacturing more than one might think. Simple items that everyone is always looking for, misplaces and just otherwise doesn't think about too often. Now there is a solution for those troublesome parts that always seem to be getting lost, misplaced or damaged... a Creform built cart specifically designed to hold rolls of labels and tape for the production process.

The cart is built using Creform system of pipe and joints and is focused on keeping the stock of labels and tape consolidated in one area to help ensure that associates can quickly find the product they are looking for. Its open design makes all the spools visible which fosters visual inventory management and selection. Particularly if there is a wide variety of types, colors and widths used in a mixed-model production environment.

The rolls are supported from the center on pins to help avoid damage and, depending on size and design, can hold one or more rolls at a time. The cart shown has 46 pin positions, and each pin can be eliminated or repositioned easily with a 5mm hex wrench.

The cart has four large diameter casters for ease of rolling and positioning, two of which lock. A wide variety of pipe color is available.

Although custom configurable, the dimensions of the cart shown are 56" W x 65" H x 26" D with a load capacity of 150 lb. Optional accessories are available which include label holders and hooks to name a few.
